ITK Engineering AG strengthen its position as supplier of software and hardware solutions in the field of medical systems; new jobs are created.

Rülzheim, 04.02.2016

With effect from January 1, 2016, ITK Engineering AG, development partner for software and systems engineering, has founded the business unit medical systems out of the previous program. By consolidating the competences and through a stronger focus on technology trends, the company strengthens its market position. Right now the company is looking for 20 engineers and computer scientists for the business unit medical systems, mostly at the headquarter in Rülzheim. Furthermore a growth in sales and employees of 15 percent per year is aimed.

“We are happy to walk this journey. Due to its high innovation dynamics and strong regulations, the medical technology market has to face special challenges. With a separate business unit, we are able to face this challenges easier and better. In addition, we can operate on the market more focused and continuously develop ourselves”, so Michael Englert, CEO and founder of ITK Engineering.

Press Release

Continuing to Grow –Technological and Personal Standards

Lutz Schüle, a long-standing employee and previous program manager, is responsible for the professional leadership. For the disciplinary management and the sales department is Dr. Alexander Huber in charge. The new business unit, which is certified according to EN ISO 13485 for development, production and services of electrical components for medical systems, comprises around 90 employees and operates internationally. "In the future we want to focus even more on market trends during in the development of software and hardware solutions. Thereby we can use our know-how in software engineering, embedded systems, model-based development and tests, control design as well as signal processing successfully – especially in areas where functional development, image-and sensor data processing, safety and security are playing a key role, like smart care, networking of medical technology and building services, as well as in the field of medical robotics. But the connected OR and the remote maintenance are also important future trends for us, for which our expertise is asked. In order to reach our strategic goals and to extend our knowledge, we will continue to increase the number of employees, so Lutz Schüle, head of the business unit medical systems at ITK Engineering.
